

Baroness LM551 Unique Selling Points

BARONESS
Quality on Demand

Ergonomically Designed Operator Area

- Comfortable raised control module with joystick operation.
- Large flat and open operator area.
- Raised suspension seat for excellent operator visibility.
- Working speed regulating lever for the optimum cut.

Mid-weight Fairway Mower

- 1540 kg net weight

Excellent Maintenance Access

- Large fully opening Engine Cover.
- Tilting operator seat for easy cleaning and access to control components.
- Durable and light weight fuel tank.
- External suction filter location for easy access and servicing.
- Covered brake assemblies to keep the system clean and functional.

Market Leading Contour Following

- Self-straightening cutting units
- Horizontal stabilizers for level lift and consistent cut.
- Download spring force to reduce bouncing and to enhance a level cut.
- Adjustable Reel Speeds.

45hp Kubota Diesel Engine

- Interim Tier IV.
- Low emissions with minimal electronics.
- Excellent power to weight ratio.
- Kubota reliability.

Multiple Cutting Unit Options

- 6.4 inch for Rye and Poa.
- 5 inch for Bent and Fescue.
- Nickel Chrome Molybdenum Reels.
- Tungsten Tipped Bedknives.
- Ability to run Groomers and rear roller brushes together.
- Adjustable Bedknife aggression.
- Easy to remove enhanced airflow grass catchers.
- Front and rear roller scrapers

Radiator Access

- Large access to radiator and oil cooler.
- Fold down oil cooler for easy cleaning.

Cross Circuit 4WD

- Balanced drive torque distribution.
- Enhanced climbing ability.
- Minimal turf damage.

Electronically Timed Sequential Lowering

- Rear units timed to fall in line with front units.
- Lowering speed of the rear units independently controlled.
- Allows cutting units to respond to contours.
- Cutting reel motors can be turn off for safe and accurate adjusting

Lift Assist Spring

- Balances down pressures between front and rear units.
- Ensures even cut between front and rear units.
- Prevents double cutting effect.

Two position rear units

- Slide forwards to eliminate uncut areas during crabbing and tight turns.
- Slide back to fit grass catchers.
- Swing out rear units for easy setting.
