

SLIDE FW SMALL

SLIDE FW SMALL has been designed for all those growers that work in small greenhouses, that means, in all those farms where it could be difficult to work with a standard machine. Its main feature is to be equipped with the cutting bar assembled in its frame. In this way the machine is made compact. And for this reason the driving wheels are the front ones. On the contrary, in the case of the model SLIDE FW the driving wheels are the back ones. SLIDE FW Small is equipped with 2 wheel drive and with a power steering. The speed movement really reaches 10 km/h. SLIDE FW standard equipment is made of: wo-wheel drive with truck wheel on demand (min. 1450 mm); stronger frame; stainless steel belt support; standard blade sidelight till 40 cm; cutting belt turning on self - centring pulleys covered by rubber that guarantee for a better liability and life of the blade; lateral room space (23 cm on each side, where the pulleys are mounted). It avoids to ruin the product on the side of the machine; cutting system with single blad; hydraulic cutting height device in the panel control with level indicator; cutting height controlled by a mechanic roller; hydraulic belt movement; adjustable belt speed by manual valve; temporary electric stop device in the forward movement and recovery at the same speed; belt according to the law for nourishing product; changeable capacity pump; Kubota engine, 3 cylinders, 21 HP; gradual speed: from 0 till 10 km/h; hydrostatic proportional forward movement with control pedals during the transfer. During the work, possibility to start the automatic forward movement and homing devices and to set the desired working speed, (according to the kind of product to be harvested); footboards for full and empty boxes; box support to fill them higgledy-piggledy.
