

## TRANSPLANTER

### TRANSPLANTER-TC

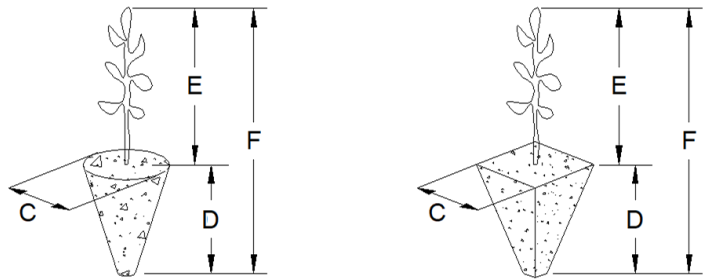

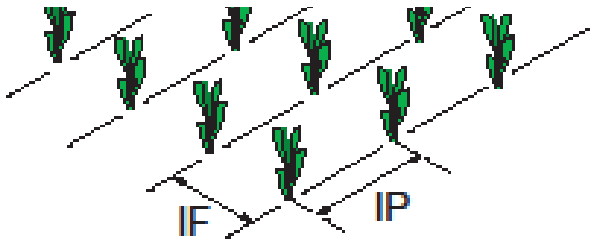

Semiautomatic with 12 cups rotating distributor

- Use: semiautomatic equipment for transplanting seedlings with a conical or pyramid-shaped root ball

All independent modules (from 1 to 6 transplant elements) are fed by 12 cups rotating distributor. Recommended for tobacco, tomato, cabbage, courgette, broccoli, and other similar seedlings.

- Adaptation to the ground and transplanting: with parallelogram arm that keeps the equipment constantly adapted to the ground, always remaining parallel to the surface; with adjusting tie rod for manually adjusting the depth of the furrow; with a knob to regulate the quantity of soil to earth up around the root balls.

- Inter-row(IF)adjustable mini-mum 45 cm (standard)
- Inter-plant(IP)adjustable minimum 12 cm.
- Approximate hourly production: around 4500 seedlings/hour per operator.

C = cm 2 ÷ 6	D = cm 4 ÷ 7	E = cm 8 ÷ 23	F = cm 12 ÷ 30

**ACCESSORIES**

- Watering system direct on seedling
- Watering system at continuous flow on row
- Water tank 330 L with fixing supports
- Hose carrier-layer with front fixing support
- 3-point hitch with telescopic bar
- Gears for additional transplant distances
- Rotating container holders with fixing supports (6)
- Double seat with support plate and fixing support
- Row tracers (pair- manual type)
- Row tracers (pair- hydraulic type)
- Tempered steel furrower
- Lister blade
- Root ball separator
- Transversal container holder at 2 shelved
- Fertilizer spreader
- Adjustable microgranulator
